

About

5+ years of software engineering experience in OTT product and design agency. Sensitive to user experiences. Be fond of embracing new concepts but not over trendy. Value on team work, well communicated with co-workers. Focus on engineering mindsets like patterns, architecture and DX. Hands-on experience in AI assistant workflow.

Typescript, JavaScript, React, Vue, Git, HTML, SCSS, CSS, Next.js, PostgreSQL, REST APIs, Python, Docker /Kubernetes

Experience

Software Engineer - GILOO Group Limited Remote, Taipei • 09/2021 - 04/2026

- **Product Impact & Performance**
 - Optimized Core Web Vitals for a 100K+ MAU streaming platform, reducing load times by 56% with LCP < 2s and CLS = 0.00 on critical pages
 - Built, iterated and maintained web streaming-platform features — video player, multilingual support, multi-currency, payment flows, AI-assisted features and creator dashboard
- **Architecture & Stack Modernization**
 - Led frontend infrastructure modernization (Next.js, TypeScript, TanStack Query) to improve developer experience and UI scalability with shadcn/ui
 - Established Cypress E2E testing covering 90+ complex data-driven user scenarios to ensure platform stability and reliability
- **Feature Development**
 - Built a content-creator system with streamlined video uploads, modular publishing workflows, and revenue management
 - Implemented internationalization capabilities for Taiwan, Hong Kong, and U.S. markets, including multi-language and multi-currency support
- **Team & Ownership**
 - Mentored a new engineer and standardized onboarding and code review processes to improve team collaboration
 - Built AI-powered features including a task-oriented autofill chatroom and a multi-step subtitle translation pipeline with real-time progress tracking and credits management

Frontend Engineer - Polish Design Remote, Taipei • 02/2020 - 09/2021

- **Framework & System Contributions**
 - Contributed to the restructuring of 40+ pages in a major network management platform redesign, introducing modern web and UI frameworks to improve scalability
- **Web Development**
 - Built a Vue-on-Rails hybrid storefront covering product discovery, cart, checkout, and subscription flows, with a centralized cart state kept in sync across discount and shipping calculations
- **High-End User Experiences**
 - Developed browser-based 3D visualizations and mobile AR interactive experiences
 - Designed and implemented interactive web animations using GSAP and CSS animations to enhance visual storytelling

Side Project

A Book RAG

- RAG system for asking questions over PDF books, with answers cited to the page. Built from-scratch: parsing, chunking, embeddings, semantic search, and grounded LLM generation with citations and anti-hallucination gates (FastAPI, pgvector, Gemini, Next.js)

Education

National Central University - M.S. Mechanical Engineering	2019
National Central University - B.S. Mechanical Engineering	2016
